Attention Mr. Kamran Afshar, examiner

Mr. Afshar,

Following your letter mailed on 07/26/2006, I amended my application to a narrower scope, in order to avoid any conflicts with prior art.

This scope reflects the core of my invention which is based on a network of relays being randomly or pseudo randomly deployed. As far as I (and my patent attorney) could check, this kind of invention is unique.

I believe that the new set of claims enclosed by, 10,710,379/03, will enable considering this application as is, without any further efforts from your side.

Sincerely,
Daniel Katz
